On the contrary. He loves what you've been doing but I think wants you to also not burn out. I don't want you getting overextended or to be coding R6 tools (unless you want to). I think this response will be intense for a while and then drop off. Regardless, prepare for a marathon and not a sprint.

Is Martin totally unhappy with what I'm doing?

Subject: SADIE Widget for JavaScript

John L.,

Please provide Janine and/or the appropriate Weston developer with our SADIE JavaScript widget code. Marty would like this widget available in the common operational viewer that will be used for the Gold King Mine emergency response. I expect that our code will need to be adapted to work with the R6 JS viewer.

Please provide Marty and me an estimate of when the widget can be deployed in the Gold King viewer.

Thanks,

John Wieber
